

**Date:**

Start: Wednesday 24 April 2019,  
09:00  
Close: Friday, 26 April 2019,  
approx. 16:00

**Location:**

Forschungsinstitut Futtermitteltechnik  
der Internationalen Forschungsgemeinschaft  
Futtermitteltechnik e.V.  
Research Institute of Feed Technology of IFF  
Frickenmühle 1A  
D-38110 Braunschweig

**Admission fees:**

For the first participant of a company the admission  
fee is for

members of IFF € 890.00  
non-members € 1,190.00.

For each further participant of the same company the

**Code word: IFF**

Price per single room/night: € 79.00 incl. breakfast  
(please book until 9 April 2019)

## Practical Course

## Essentials of feed compounding technologies

24 to 26 April 2019

The feed sector plays a key role within the animal sectors, for both animal husbandry and pets. Healthy, safe and high quality feed is essential for healthy animals and the production of tasty and safe animal products such as milk, eggs and meat. The quality of feed is partly safeguarded by good knowledge concerning the whole production process: what is the effect of refining processes on the quality of feed? Process technology is the central topic during this training course where participants will gain insight into the production process of feed manufacturers. Furthermore, attention will be paid to the use of various resources, quality control, energy management and safety assessment.

**Target group:**

This course is intended for advisors, technical staff and other interested personal working in the feed industry. It is also recommended to employees of the supplying industry, nutritionists and policy makers.

**Basic processes in compound feed production**

- Storage
- Conveying
- Dosing
- Milling and grinding
- Mixing
- Steam generation and conditioning
- Hygienisation
- Pelleting
- Cooling
- Expanding/extrusion
- Vacuum coating
- Sample taking
- Material properties

**Lab testing**

- Milling
- Mixing
- Pelleting and pellet quality

**Operating feed mills**

- Compound feed quality and HACCP
- Energy management
- Explosion protection

Imparted knowledge will be deepened in practical experiments in our technical lab.

Experiences and knowledge will be imparted in updated lectures by the scientific staff of the institute and practice consultants. Enhanced practical courses on selected subjects shall illustrate the contents brought forward.

Each participant receives a workbook containing all lectures and documents.

The attendance at the course will be attested.

The lectures will be given in English language.

Please consider the special discount for the participation of multiple employees of a company!
