IFF Practical Course

Fundamentals in feed-compounding technology

9 to 13 April 2018

Research Institute of Feed Technology of IFF
D-Braunschweig, Frickenmühle 1A

Topics

The feed industry has to meet manifold requirements in its function as reliable partner in the chain for the production of foods of animal origin. In view of the dynamic developments of the market, there are considerable efforts necessary for safeguarding the competitiveness.

Based on both class education and practical experiences, updating, extension and refreshment of required knowledge for an economic and safe compound-feed production is given. Furthermore, attention will be paid to the use of various resources and quality control.

Target group:

This course is intended for advisors, technical staff and other interested personal working in the feed industry. It is also recommended to employees of the supplying industry, nutritionists and policy makers.

Content

Learning content will be given in modules:

Module 1: Basic processes in compound feed production

- Storage, conveying, pelleting, extruding
- Hygienisation
- Additives, mixing stability

Module 2: Lab testing

- Sample taking and partitioning
- Pellet quality

Module 3: Operating feed mills

- Legal requirements
- HACCP
- Energy management
- Explosion protection

Module 4: Basics on animal nutrition

- Feed uptake and conversion
- Livestock feeding (cattle, pork, poultry)

Imparted knowledge will be deepened in practical experiments in our technical lab.

(Subject to change)

Instruction

Experiences and knowledge will be imparted in updated lectures by the scientific staff of the institute and practice consultants. Enhanced practical courses on selected subjects shall illustrate the contents brought forward.

Each participant receives a workbook containing all lectures and documents.

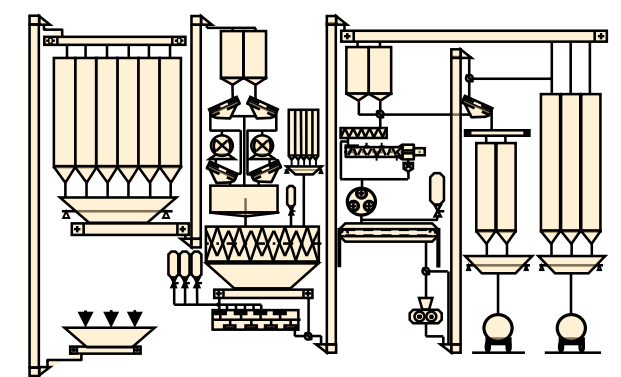

The attendance at the course will be attested. The successful participation in a written examination on available and acquired know-how will be certified.

The successful graduation can be used as proof of the technical know-how.

(In Germany: acc. to FuttMV and VO (EG) 183/2005)

The lectures will be given in English language.

Please consider the special discount for the participation of multiple employees of a company!
